CONFERENCE REPORT ON S. 507, WATER RESOURCES DEVELOP- MENT ACT OF 1999

Mr. SHUSTER. Mr. Speaker, I call up the conference report on the Senate bill (S. 507) to provide for the conservation and development of water and related resources, to authorize the Secretary of the Army to construct various projects for improvements to rivers and harbors of the United States, and for other purposes and ask unanimous consent for its immediate consideration and that the conference report be considered as read and adopted.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

Mr. OBERSTAR. Reserving the right to object, Mr. Speaker, I am very pleased that we are bringing to the House a conference report on the Water Resources Development Act of 1999, a culmination of 3 years work of the Committee on Transportation and Infrastructure.

Mr. Speaker, I yield to the gentleman from Pennsylvania (Mr. SHUSTER) for any comment that he may make.

(Mr. SHUSTER asked and was given permission to revise and extend his remarks.)

Mr. SHUSTER. Mr. Speaker, I support this wonderful product.

Mr. Speaker, I rise in strong support of the conference report accompanying S. 507, the Water Resources Development Act of 1999.

This bill is a comprehensive authorization of the Water Resources Programs of the Army Corps of Engineers. It represents two and a half years of bi-partisan effort to preserve and

develop the water infrastructure that is vital to the nation's safety and economic well-being.

First, let me congratulate my colleagues on the Committee on Transportation and Infrastructure for their vision and tireless efforts in helping move this legislation. I want to give special thanks to committee ranking member JIM OBERSTAR, subcommittee chairman SHERY BOEHLERT, and subcommittee ranking member BOB BORSKI. Their leadership and contributions have been outstanding.

These members and the other House conferees from the committee provided invaluable assistance.

Mr. Speaker, in the 105th Congress, the House and Senate worked tirelessly to enact a Water Resources Development Act of 1998. Unfortunately, that bill did not become law, essentially because of the lingering controversies surrounding the American River in California.

This year we committed ourselves to moving a WRDA '99, resolving any remaining issues, and charting a course for a WRDA 2000, as well.

I am proud to say we have delivered: first by passing a bill in April by a vote of 418 to 5 and second, by bringing this conference report to the floor today.

Mr. Speaker, S. 507 accomplishes three important objectives:

First, it reflects the committee's continued commitment to improving the Nation's water infrastructure.

Second, it responds to policy initiatives to modernize Corps of Engineers activities and to achieve programmatic reforms.

Third, and this is very important, it takes advantage of the Corps capabilities and recognizes evolving national priorities by expanding and creating new authorities for protecting and enhancing the environment.

S. 507 is a strong bipartisan bill. It reflects a balanced, responsible approach to developing water infrastructure, preserving and enhancing the environment and strengthening federal-state-and-local partnerships.

Several provisions merit particular attention and, in some cases, clarification:

We are modifying current cost-sharing requirements on shore protection and, as a result, expect the administration to budget accordingly for shore protection projects.

We are making several important changes to the Environmental Dredging Program authorized in section 312 of WRDA 1992. Section 312, as amended by section 205 of the Water Resources Development Act of 1996, created a partnership with the expectation that the Corps' authority would supplement EPA CERCLA actions. We believe the Corps policy guidance letter no. 49 inappropriately attempts to limit opportunities for Corps participation at sites that could benefit from the section 312 program.

We are authorizing a new program for flood mitigation and riverine restoration, with 23 sites listed for priority consideration. One of those sites, Coachella Valley, Riverside California, includes a project for flood protection and environmental restoration at the delta area of the Whitewater River as it flows into the Salton sea. The \$8.5 million project includes restoration of Salton Sea Wetlands. I thank Rep. MARY BONO for her efforts in sponsoring this provision.

Section 357 authorizes the locally preferred project for flood control along the Upper Jordan River, Utah, notwithstanding the Corps'
